

## PRESS RELEASE

JUNE 2016

**GREEN CLEAN** presents improved sensor cleaning system for digital cameras.

**Wet & Dry Sensor Cleaner:**  
Sensor cleaning made easy.

**Sensor cleaning has been a hot topic among photographers ever since the beginning of digital photography.**

With the world's leading WET & DRY cleaning system, GREEN CLEAN has offered the optimal solution for dirty camera sensors for years. Now the proven system has been further optimized with a new DRY SWEEPER.

When shooting with DSLR's (digital single lens reflex cameras) and especially with the new mirrorless system cameras, dirt can often present major problems which is visible on the final image. Dirt can enter the camera when changing lenses – and thus dust, pollen, sea water, greasy mechanical residues, and any type of air pollution can settle on the sensor unimpeded.

**GREEN CLEAN offers the solution.**

The unique Sensor Cleaning System from GREEN CLEAN removes impurities effortlessly. Loose dirt particles are simply sucked up contact- and residue-free with the MINI VACUUM. Any adhesive residue can be removed with the proven WET & DRY Sensor Cleaner. The dirt is dissolved using the pre-impregnated WET FOAM SWAB sponge and then removed with the DRY SWEEPER spatula. The high quality, both in materials as well as in the production process, guarantees professional cleaning results!

**WET & DRY – now even more efficient,**

for even more effective cleaning, GREEN CLEAN has optimized, ergonomically adapted and equipped the DRY SWEEPER with a silk derivative cloth. This guarantees even simpler, lint and streak-free cleaning. The optimized DRY SWEEPER perfectly suits all DSLR and mirrorless camera formats. Developed and manufactured by GREEN CLEAN in Austria.

### **ABOUT GREEN CLEAN:**

The Austrian company GREEN CLEAN for fine technics has been a leading manufacturer of cleaning products for photography, optics and electronics, laser technology etc...for 40 years. The product line includes Air Duster and Dusting Tools, camera sensor cleaner, optics cleaner and computer cleaning products, as well as fluids, cloths and cleaning swabs for various service areas.
